

STT University
Opens Doors to Future
Pro Traders

stocksto**trade**

At STT University, you'll learn everything you need to know to get started as a trader. You'll also learn how to use the STT system and all its tools, and then you'll learn how to plan trades with each STT tool.

It's completely hands on.

Video and other lessons on specific stocks take you through technical and fundamental indicators using STT tools so you can see exactly how they work, and how you can make money. You'll also be signed up for StocksToTrade Basics 101, where you can take advantage of 7 lessons on the basics/essentials of STT.

The best part is that you get to do all of this with STT University instructor Tim Bohan, the lead trainer for STT.

We chose Tim to head the STT University because he has 40 years of successful trading under his belt, and he embodies exactly what it means to be a successful, consistent trader. That's why he's still around.

He inspires and instills students with the rationality, patience, commitment and determination they need to make consistent profits, starting out small and compounding indefinitely.

Tim chose us because he saw in STT what the multitude of other platforms were lacking: dynamism, advancements and evolution.

"Every trade I make has a plan—or I don't enter that trade," says Tim. "That is what attracted me to STT. For the past two years, the platform has been evolving—fast; and it gave me all the tools to see all the data so I can make a stellar trade plan every time."

And STT University is free to all STT Pro members—so there's absolutely no excuse not to get back to school. You're not too old, evolution is your friend, and if you're already an STT Pro member, it's free on top of that.

Basically, STT University is a learning center for traders aspiring to success and growth without getting overwhelmed.
